DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 9-12, 14-19 and 24-27 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an apparent molecular weight of 310,000-380,000 and 500,000, and a vinyl content of 10-80% and 8% does not reasonably provide enablement for an apparent molecular weight of 380,001-499,999 and a vinyl content of 9%. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. Furthermore, the polymer having the 500,000 apparent molecular weight is used as a comparative example, which does not have the viscosity stability and gel resistant properties of the originally claimed composition.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1714

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 9-12, 14-19 and 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujiwara et al. 6,833,411, in view of Heimerikx et al. 6,949,593.

6. The Declaration of Mr. Korentstra is not commensurate with the newly claimed molecular weight range. There is no proof that the claimed block polymer having an apparent molecular weight of 380,001-500,000 has been ever made and blended with bitumen. The rejection is maintained.

Response to Arguments

7. Applicant's arguments filed 8/10/06 have been fully considered but they are not persuasive. Fujiwara et al. disclose a number average molecular weight of 30,000-500,000, a vinyl bond of less than 40% in claim 1. References must be considered for all they disclose and must not be limited to their preferred embodiments or working examples. Heimerikx et al is cited only to show that mixed midblock triblock copolymers have low diblock content. The test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is want the combined teachings of the references would have suggested to those of ordinary skill in the art. The rejection is maintained.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
